Presentastic is a demo app I created to show off how easy it is to take advantage of ColdFusion's cool capabilities for working with PowerPoint files. **The instructions for creating Presentastic are available via this link.** Check it out!

2009-11-19 UPDATE: You asked for it, you got it: **The actual code file for PresentasticPlus is available via this link.** PresentasticPlus is the version of the app that implements the PDF Portfolio creation functionality referenced at the end of the instruction document.

2009-12-01 UPDATE: The one cool new ColdFusion 9 feature for working with PowerPoint files that the original app didn't showcase was converting HTML to PPT--so in order to showcase this feature, I created a new version: PresentasticGold. **The code file for PresentasticGold is available via this link.**
