

Purchasing a ColdFusion Builder 2 + Flash Builder 4.5 Bundle

Posted At : May 31, 2011 5:00 PM | Posted By : Josh Adams

Related Categories: Adobe, ColdFusion, ColdFusion Builder, Flash Builder

If you purchase either ColdFusion Builder 2 or Flash Builder 4.5 **Premium** as a standalone product (that is, not part of a Creative Suite 5.5 product bundle), you will get a license for both ColdFusion Builder 2 **and** Flash Builder 4.5 as follows:

- ColdFusion Builder 2 includes a license for Flash Builder 4.5 **Standard**.
- Flash Builder 4.5 **Premium** includes a license for ColdFusion Builder 2.

So these products then are actually mini-bundles, hence the title of this post. :)

Two important notes:

- While Creative Suite 5.5 Web Premium and Creative Suite 5.5 Master Collection both include a license for Flash Builder 4.5 Premium, neither includes a license for ColdFusion Builder 2. However, if you purchase Creative Suite 5.5 Web Premium or Creative Suite 5.5 Master Collection, you can purchase an upgrade license for ColdFusion Builder 2 (that is, you're eligible for upgrade pricing for ColdFusion Builder 2; you don't have to buy the full version of ColdFusion Builder 2).
- Flash Builder 4.5 **Standard** does **not** include a license for ColdFusion Builder 2 and as well as I am aware upgrade pricing is not available for ColdFusion Builder 2 (that is, you are **not** eligible for upgrade pricing for ColdFusion Builder 2; you **do** have to buy the full version of ColdFusion Builder 2).

Speaking of upgrade pricing, there is (of course!) upgrade pricing available for those looking to move to ColdFusion Builder 2 from ColdFusion Builder 1 (at the time it was released, it wasn't called ColdFusion Builder 1, it was merely called ColdFusion Builder, but now that ColdFusion Builder 2 has been released, we often refer to the first release of ColdFusion Builder as ColdFusion Builder 1). And there is also upgrade pricing available for those looking to move to Flash Builder 4.5 or one of the Creative Suite 5.5 bundles from earlier versions of those products.

So let's see if I can create a helpful little chart here:

Product	ColdFusion Builder 2 License	Flash Builder 4.5 License
ColdFusion Builder 2	Included	Standard Included Upgrade to Premium Available
Flash Builder 4.5 Standard	NOT Included No Upgrade Available*	Standard Included Upgrade to Premium Available
Flash Builder 4.5 Premium	Included	Premium Included
Creative Suite 5.5 Web Premium	NOT Included Upgrade Available	Premium Included
Creative Suite 5.5 Master Collection	NOT Included Upgrade Available	Premium Included

* Note that while you cannot purchase an upgrade license for ColdFusion Builder 2 from Flash Builder 4.5 Standard, you will get ColdFusion Builder 2 if you upgrade Flash Builder 4.5 Standard to Flash Builder 4.5 Premium.

2011-06-06 UPDATE: There is no mention made of the type of license (that is, full or upgrade) required when buying Flash Builder 4.5 Premium or ColdFusion Builder 2 in order to get the "mini-bundle" benefit because that benefit applies to both the full and upgrade versions of Flash Builder 4.5 and ColdFusion Builder 2. That is to say, if you're upgrading to Flash Builder 4.5 Premium, you do in that case get a license for ColdFusion Builder 2 just as you do if you buy the full version of Flash Builder 4.5 Premium; if you're upgrading to ColdFusion Builder 2, you do in that case get a license for Flash Builder 4.5 Standard (I suppose the one exception to this may be if you're upgrading from Creative Suite 5.5 Master Collection or Creative Suite 5.5 Web Premium, since these already include Flash Builder 4.5 Premium), just as you do if you buy the full version of ColdFusion Builder 2.
