Two months after the beta hit **Adobe Labs**, ColdFusion Builder 2 is now available! You can find information and links to learn lots more about it, to try it, and to buy it at <http://www.adobe.com/products/coldfusion-builder.html>. And be sure to check out the ColdFusion Builder team's blog at <http://blogs.adobe.com/cfbuilder>.

ColdFusion Builder 2 now comes in a **free** edition called ColdFusion Builder 2 Express! I'm not seeing much in the way of details ColdFusion Builder 2 Express listed on the Adobe site but **Ray Camden's blog post about it** and **Ben Forta's blog post about it** are good places to get a bit of information.
